Professional Summary

Infrastructure and Cloud Engineer with enterprise experience in Active Directory administration, identity and access management, and scripting-based automation at Birlasoft. Built and deployed real-world projects using Python, ReactJS, and Docker. Microsoft Azure certified (AZ-900) with a strong foundation in Windows Server, Linux, and cloud operations — actively transitioning into Platform and DevOps Engineering roles.

Technical Skills

Cloud & IAM	Microsoft Azure, Azure Entra ID, AWS ECR, Active Directory (on-prem), RBAC, Group Policy
Infrastructure	Windows Server, Linux (Ubuntu), DNS, AD Certificate Services, Virtualization
Containers	Docker (Dockerfile, Compose, networking, volumes, image tagging, registry push)
Scripting	PowerShell (AD automation), Python, Bash
Dev & VCS	Git, GitHub, ReactJS, TailwindCSS, Firebase
Ops & Compliance	Incident management, SOX audit support, DR validation, access reporting

Professional Experience

Infrastructure & Cloud Operations Engineer

Jun 2024 – Present

Birlasoft Ltd., Pune

- Administered on-premises Active Directory — user provisioning, group management, and access control for enterprise environments.
- Automated AD administrative tasks using PowerShell scripts, reducing manual effort on repetitive identity management operations.
- Performed DNS record configuration and validation across production zones to maintain service availability.
- Supported Active Directory Certificate Services (AD CS) — certificate requests, renewals, and basic PKI operations.
- Maintained SOX compliance documentation and prepared evidence packages for internal and external audit cycles.
- Participated in disaster recovery exercises including failover validation and rollback testing.
- Investigated and resolved IAM access incidents across enterprise identity infrastructure.

Projects

EntraHub — Self-Service Access Management Portal

[GitHub](#) [Live Demo](#)

ReactJS · TailwindCSS · Firebase · MSAL · Python

- Built a self-service web portal enabling Azure AD access requests, replacing a manual email-based workflow.
- Integrated MSAL for token-based SSO authentication with Firebase backend and ReactJS/TailwindCSS frontend.
- Deployed live at entra-hub.vercel.app — open source on GitHub.

OneTheraCure — AI Healthcare Platform

2024 onetheracure.com

ReactJS · Frontend Development · AI Integration

- Contributed frontend development for an AI-powered healthcare platform delivering clinical support and patient care solutions.
- Built UI components integrating AI-driven backend services for clinician workflows — similar in scope to Microsoft Dragon Copilot.

Education

B.E. Computer Science, AISSMS College of Engineering, Pune

2024 CGPA: 9.13/10

Diploma in Information Technology, Government Polytechnic, Kolhapur

2021 95.38%

Certifications & Achievements

- **Microsoft Azure Fundamentals (AZ-900)** — Microsoft
- **Google Cloud Essentials** — Google Cloud Skills Boost
- **Hacktoberfest 2022** — Open Source Contributor, DigitalOcean
